

Caniggia Thompson

Software Engineer

I am a software engineer with a passion for problem-solving and building tools. A major problem I solved was getting a playing cards API to connect to my blackjack web-based game. My tenacity to never give up on problems is what sets me apart. Due to my passion for solving problems, I love to attack a problem directly and efficiently to find a solution. Thus, I'm always learning new skills to make me better to solve future problems that are bound to come my way.
